The Difference in Beds

Your bedding retailer can not stock every bed that is available, so their selection is carefully made to give a comfort, quality and price range established from their extensive experience, usually over many years of satisfying peoples needs.

Your task is to choose a bed that you find comfortable and suits your budget. Price is more often than not a measure of quality. Your assessment of comfort will usually be measured against the bed you are currently sleeping in. Our recommendation is to choose a bed that is slightly firmer rather than softer than you are used to.

The manufacturer of this product is a member of the world wide Therapedic group who cooperates in the development of the latest technology for use in the bedding industry.
