COPPERPEDIC
ADVANCED MEMORY FOAM

SLEEP COOLER WITH COPPER

Ever notice that copper pipes are always ice cold? We've discovered that copper is the preferred material for most cooling systems because it doesn't hold onto the heat around it. This combined with our open cell Visco results in your mattress never over heating.

BETTER BLOOD CIRCULATION

People wear copper bracelets to improve their body's blood circulation. Copper emits antioxidants and anti-inflammatory properties, we thought that there would be no better way to improve your sleep than through improving your blood flow.

JOINT PAIN RELIEF & ANTIMICROBIAL

It's been known for centuries that copper has many medical benefits. It's known to reduce joint inflammation and it's antimicrobial which reduces the risk of microbes and bacteria growing in the Visco.

WITHSTANDS HEAVY LOADS

At deep compression areas the Copper minerals prevent the Visco from bottoming out and provides extra support in areas such as hip and shoulder. Viscopper provides superior comfort and pressure relief.

Mattress Features

- 5 zone pocket spring
- Copper infused memory foam
- Australian made
- Contains HourGlass Back Support
- Fabric contains copper lurex thread
- Available in Plush, Medium and Firm comfort levels
- 15 yr warranty

Coppergel advanced memory foam is cool which helps dissipate excess body heat.
